

Customized Termination Boards D5000/D6000 Series

FOXBORO FBM200

These Termination Boards (TB) provide direct connection between the I/O Card of the system and D5000 / D6000 Series modules, which interface the field. Intrinsically Safe protection and signal isolation between Safe and Hazardous Area are provided by D5000 Series Associated Apparatus. Two 24 Vdc Power Supplies are connected to the TB to enforce redundancy. Power supplies out of range and cumulative module fault can be monitored through a dedicated contact. Modules are supplied via Termination Board power bus. TB are provided with DIN-Rail mounting kit with plastic clips.
