

D5291

SIL3 Relay Out Module for 10 A ND Loads

The D5291 is a relay module suitable for switching safety related circuits, up to SIL 3 level, for high risk industries. It provides isolation between input and output contacts. It makes available a NO and a NC contact for Normally De-energized (ND) loads, with either Normally De-energized or Normally Energized coil, and a contact for service purpose. A wide compatibility towards different DCS/PLC is guaranteed: driving pulse testing is permitted by a dedicated internal circuit, which prevents contact and LED flickering. This relay module is not suitable for low-current consumption applications (system-to-system signalling, driving LEDs, etc.).

FEATURES

- SIL 3 / SC 3 for ND loads with ND/NE driver
- Installation in Zone 2/Div. 2
- Up to 10 A functional / 16 A inrush current
- Compatible with DCS/PLC pulse testing
- Service contact available
- Input/Output isolation
